EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 4 (Currently Amended): "claim 3" has been changed to - - claim 1 - -.

Claim 5 (Currently Amended): "claim 3" has been changed to - - claim 1 - -.

Note that claim 3 was canceled in the amendment filed 5-10-06.

2. The following is an examiner's statement of reasons for allowance:

Applicant's amendments to the claims and applicant's arguments, especially on pages 8-9 overcome the rejections applied in the last office action. Applicant has clarified that the two machining steps are performed by a first rotating work tool and a second linear work tool as recited in claim 1 and described on page 8, lines 15-18 of the response filed 5-10-06. It is noted that the secondary reference (Fujikawa) applied in the last office action teaches two linear work tools and no rotating work tool. In addition, Fujikawa makes holes in a flat plate rather than a cylindrical wall as claimed. Therefore, the combination of features found in claim 1 overcomes the prior art rejections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

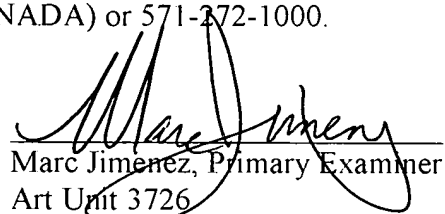

3. Claim 1 is allowable. Claims 4-5, previously withdrawn from consideration as a result of a restriction requirement, include all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions identified as species A-C, as set forth in the Office action mailed on 11-2-05, is hereby withdrawn** and claims 4-5 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) including all the limitations of an allowable claim is presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
